

Turn Key Projects: -

1. Effluent Treatment Plant (ETP)
2. Common Effluent Treatment Plant (CETP)
3. Zero Liquid Discharge (ZLD) System
4. Water treatment plant
5. Reverse Osmosis
6. Compact Sewage Treatment System (CSTS)
7. Sewage Treatment plant (STP)
8. Multi Effect Evaporation (MEE)
9. Spray Dryer
10. Solvent Stripper

Sustainable Solutions: - Green Building Solutions :-

1. Sustainable Design Solutions for Building Envelop
2. Environmental Planning
3. IGBC (Indian green Building Council)
4. Document Preparation and Certification
5. Daylight and Ventilation Analysis

High Rise Building Construction Clearance :-

1. Wind Analysis
2. Water and waste water plan study
3. Air Emission :- Traffic and Impact
4. Study of Ecological Aspects and Vegetation
5. Shadow analysis

B. Audit

C. Training

D. Green Energy

E. CSR/ESR

F. Fire Safety

G. Skill Development

H. Safety Services

1. Quantitative Risk assessment
2. Hazid & Hazop Study
3. Safety Integrity Level Study
4. Bow- Tie Development
5. Lopa Study and review
6. Process Safety Management Auditing
7. Project Safety Management
8. Behavior Based Safety Program Development and Implementation
9. Job Hazard Analyses
10. Ergonomic Hazard Evaluations and Solutions
11. Incident Investigations / Root Cause Analysis
12. Loss Prevention and Loss Control Programs

1. Occupational Health & Industrial Hygiene

1. Industrial Hygiene Management System (IHMS) Development
2. Base Line Qualitative Exposure Assessment
3. Exposure Monitoring
4. Noise Vibration / EMF, Heat Stress
5. Ergonomic Hazard Evaluations and Solutions

ABOUT US

Our motto “Committed for Better Solutions” is the Spirit of PNM Enviro-Safe Solutions Pvt. Ltd.

We are committed to exponential growth through innovative ideas.

PNM Enviro-Safe Solutions is the company where full range of Environmental, Health and Industrial Safety as well as Corporate / Environment Social responsibility Solutions are available under one umbrella.

PNM is an independent company offering high quality technical services in the disciplines of Environment, Health and Safety.

The firm is a privately held corporation and is not a subsidiary of any another company. Its Services are accurate and timely provides technical information confidentially at a reasonable cost.

Environmental sustainability practices are incorporated by identifying and implementing techniques that emphasize the environmental management hierarchy of

pollution prevention through Four ‘R’ (Reduce, Reuse, Recycle and Recover) treatment, and environmentally safe disposal.

Vision: - Our vision is to achieve leadership in the field of Environmental Management and Pollution Control, Occupational / Environmental Health and Industrial Safety Management through Our Services.

Our mission: is to provide accurate and timely technical information at a reasonable cost. We are committed to environmentally responsible operations, which include using natural resources wisely and considering the overall impact on the environment.

Values: - Foundation of organization depends on principles of recognizing the value of customer satisfaction; our goal is to provide exceptional services with quality results in a scheduled time. Honesty and confidentiality is the core Ethics of the Organization

A. Environmental services: -

1. Environment Consultancy Services and Clearance
2. Environmental Impact Assessment
3. Environmental Management Plan
4. Environmental Monitoring / Compliance Monitoring: - Air, Water, Soil and Noise
5. Risk Assessment
6. Disaster Management Plan
7. Baseline Environmental Assessment
8. Environmental Due Diligence
9. Waste Management
10. Environmental Auditing
11. Carbon Calculation and disclosure
12. Rain Water Harvesting
13. Coastal Regulation Zone (CRZ) Consultancy Services & EC Applications for Infrastructure and CRZ Projects
14. Consultancy for Turn Key Projects for STP, ETP, Water Treatment, Zero Liquid Discharge and Reverse Osmosis.
15. Green Building and High Rise Construction.
16. Environment Health monitoring and analysis

Environmental Analysis – Laboratory Services :-

1. Ambient Air / Work Place Air Quality Monitoring
2. Ground and surface water quality Testing : - (Water / Sewage / Industrial / Waste Water)
3. Stake Emission Monitoring
4. Noise Monitoring
5. Light Intensity Monitoring (Lux Monitoring)
6. Soil Analysis
7. Metrological Monitoring
